Manganese limitation as a mechanism for reduced decomposition in soils under atmospheric nitrogen deposition

Emily D. Whalen, Richard G. Smith, A. Stuart Grandy, Serita D. Frey

PII: S0038-0717(18)30336-5

DOI: [10.1016/j.soilbio.2018.09.025](https://doi.org/10.1016/j.soilbio.2018.09.025)

Reference: SBB 7292

To appear in: *Soil Biology and Biochemistry*

Received Date: 19 June 2018

Revised Date: 25 September 2018

Accepted Date: 26 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
