Evaluation of biomimetically synthesized mesoporous silica nanoparticles as drug carriers: Structure, wettability, degradation, biocompatibility and brain distribution

Heran Li, Xueqian Wu, Baixue Yang, Jing Li, Lu Xu, Hongzhuo Liu, Sanming Li, Jinghua Xu, Mingshi Yang, Minjie Wei

PII: S0928-4931(18)30326-6
DOI: doi:[10.1016/j.msec.2018.09.053](https://doi.org/10.1016/j.msec.2018.09.053)
Reference: MSC 8916
To appear in: *Materials Science & Engineering C*
Received date: 1 February 2018
Revised date: 28 July 2018
Accepted date: 20 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Evaluation of biomimetically synthesized mesoporous silica nanoparticles as drug carriers: structure, wettability, degradation, biocompatibility and brain distribution
