Experimental and theoretical studies of benzaldehyde thiosemicarbazone derivatives as corrosion inhibitors for mild steel in acid media

H.H. Zhang, Y. Chen

PII: S0022-2860(18)31130-X
DOI: 10.1016/j.molstruc.2018.09.048
Reference: MOLSTR 25682
To appear in: *Journal of Molecular Structure*
Received Date: 28 July 2018
Accepted Date: 17 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
