

Accepted Manuscript

Isolated and combined effects of elevated CO₂ and high temperature on the whole-plant biomass and the chemical composition of soybean seeds

C.J. Palacios, A. Grandis, V.J. Carvalho, A. Salatino, M.S. Buckeridge

PII: S0308-8146(18)31623-6

DOI: <https://doi.org/10.1016/j.foodchem.2018.09.052>

Reference: FOCH 23539

To appear in: *Food Chemistry*

Received Date: 26 May 2018

Revised Date: 7 September 2018

Accepted Date: 9 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Original Research

Isolated and combined effects of elevated CO₂ and high temperature on the whole-plant biomass and the chemical composition of soybean seeds

C. J. Palacios^a, A. Grandis^b, V. J. Carvalho^b, A. Salatino^a, M. S. Buckeridge^{b*}
