This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Data-driven scheduling optimization under uncertainty using Renyi entropy and skewness criterion

Zhiguo Wang¹, Chee Khiang Pang², Tsan Sheng Ng¹

Manuscript submitted on 2nd March 2018 for review. This research did not receive any specific grant from funding agencies in the public, commercial, or not-for-profit sectors.

¹ Zhiguo Wang and Tsan Sheng Ng are with Department of Industrial Systems Engineering and Management, National University of Singapore, Singapore 117576.
