This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We evaluate the effect of a Swedish payroll tax reduction for young workers
- We find small overall effects on employment and wages, also in the long run
- Employment response is strongest for the very youngest workers
- We find no effect on hours worked
- Lower payroll taxes had no impact on immigrants and previously unemployed
