This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Very small superparamagnetic iron oxide nanoparticles:
long-term fate and metabolic processing in atherosclerotic mice**

This project was supported by the Deutsche Forschungsgemeinschaft (DFG) within the Clinical Research Unit KFO 213 to VS, AL, MT, and SW, and the DFG priority programme SPP1681 to FW. Additional funding was provided by the DFG (EXC NeuroCure) and the BMBF (01EO0801, Center for Stroke Research Berlin) and 01EW1201 under the ERA-NET-NEURON scheme funded by the European Commission to PBS and the Friede Springer Herz Stiftung to WCP. WCP is participant in the BIH-Charité Clinical Scientist Program funded by the Charité – Universitätsmedizin Berlin and the Berlin Institute of Health.

Conflict of interest statement: All authors confirm that there are no conflicts of interest
