This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- We consider coherent systems subject to internal failures and external shocks.
- The probability of failure of components subject to shocks is derived.
- A new third-moment saddlepoint approximation approach is proposed.
- Survival signature is applied to calculate the reliability of the system.
