This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- A supertagger for Spanish HPSG is created
- The supertagger classifies lexical frames for verbs, nouns and adjectives
- The accuracy of the supertagging process is: 84.16% for verbs, 86.60% for nouns and 91.30% for adjectives considering the top three tags
- The supertagger uses lemmas, POS and word embeddings as training features
