This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Multimodal biometric system based on Iris, finger vein and fingerprint.
- Performance optimization using Backtracking Search Optimization (BSA).
- Optimal score level fusion model resolves conflicts among classifier scores.
- The results exhibits low equal error rate and high accuracy.
