

## Accepted Manuscript

Title: Water-Insoluble Hybrid Materials Based on Polyoxomolybdate Nanoclusters as Efficient Catalysts

Authors: Alireza Abbasi, Mahnaz Najafi, Jan Janczak

PII: S2213-3437(18)30590-6  
DOI: <https://doi.org/10.1016/j.jece.2018.09.047>  
Reference: JECE 2668

To appear in:

Received date: 13-7-2018  
Revised date: 5-9-2018  
Accepted date: 24-9-2018

Please cite this article as: Abbasi A, Najafi M, Janczak J, Water-Insoluble Hybrid Materials Based on Polyoxomolybdate Nanoclusters as Efficient Catalysts, *Journal of Environmental Chemical Engineering* (2018), <https://doi.org/10.1016/j.jece.2018.09.047>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Water-Insoluble Hybrid Materials Based on Polyoxomolybdate Nanoclusters as Efficient Catalysts
