Siting enhanced geothermal systems (EGS): Heat benefits versus induced seismicity risks from an investor and societal perspective

Theresa A.K. Knoblauch, Evelina Trutnevyte

PII: S0360-5442(18)30746-1

DOI: [10.1016/j.energy.2018.04.129](https://doi.org/10.1016/j.energy.2018.04.129)

Reference: EGY 12768

To appear in: *Energy*

Received Date: 14 November 2017

Revised Date: 9 March 2018

Accepted Date: 22 April 2018

Please cite this article as: Knoblauch TAK, Trutnevyte E, Siting enhanced geothermal systems (EGS): Heat benefits versus induced seismicity risks from an investor and societal perspective, *Energy* (2018), doi: 10.1016/j.energy.2018.04.129.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Siting enhanced geothermal systems (EGS): Heat benefits versus induced seismicity risks from an investor and societal perspective
