Solution-processable liquid crystalline chrysene semiconductors with wide band gap:  
Self-organization and carrier transport properties

Tengzhou Yang, Fuhua Dai, Hiroaki Iino, Masayuki Kanehara, Xuying Liu, Takeo Minari, Chuan Liu, Junichi Hanna

PII: S1566-1199(18)30486-5

DOI: [10.1016/j.orgel.2018.09.021](https://doi.org/10.1016/j.orgel.2018.09.021)

Reference: ORGELE 4887

To appear in: *Organic Electronics*

Received Date: 18 January 2018

Revised Date: 17 June 2018

Accepted Date: 13 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
