pH-sensitive and magnetically separable Fe/Cu bimetallic nanoparticles supported by graphene oxide (GO) for high-efficiency removal of tetracyclines

Parnaz Tabrizian, Wen Ma, Ahmed Bakr, Md. Saifur Rahaman

PII: S0021-9797(18)31109-3
DOI: <https://doi.org/10.1016/j.jcis.2018.09.034>
Reference: YJCIS 24085

To appear in: *Journal of Colloid and Interface Science*

Received Date: 20 June 2018
Revised Date: 24 August 2018
Accepted Date: 10 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**pH-sensitive and magnetically separable Fe/Cu bimetallic nanoparticles supported
by graphene oxide (GO) for high-efficiency removal of tetracyclines**
