This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We propose a personality prediction method based on image scene perception.
- Users with the same personality have similar preferences for image scenes.
- A number of image scenes are recognized to solve a user-centric prediction problem.
