

Accepted Manuscript

Shall deep learning be the mandatory future of document analysis problems?

Nicole Vincent, Jean-Marc Ogier

PII: S0031-3203(18)30329-7
DOI: <https://doi.org/10.1016/j.patcog.2018.09.010>
Reference: PR 6660

To appear in: *Pattern Recognition*

Received date: 14 December 2017
Revised date: 27 July 2018
Accepted date: 11 September 2018

Please cite this article as: Nicole Vincent, Jean-Marc Ogier, Shall deep learning be the mandatory future of document analysis problems?, *Pattern Recognition* (2018), doi: <https://doi.org/10.1016/j.patcog.2018.09.010>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We propose an insight thinking on the evolution of document analysis systems
