Architecture-based Change Impact Analysis in Cross-disciplinary Automated Production Systems

Robert Heinrich, Sandro Koch, Suhyun Cha, Kiana Busch, Ralf Reussner, Birgit Vogel-Heuser

PII: S0164-1212(18)30171-7
DOI: <https://doi.org/10.1016/j.jss.2018.08.058>
Reference: JSS 10213

To appear in: *The Journal of Systems & Software*

Received date: 12 November 2017
Revised date: 10 July 2018
Accepted date: 26 August 2018

Please cite this article as: Robert Heinrich, Sandro Koch, Suhyun Cha, Kiana Busch, Ralf Reussner, Birgit Vogel-Heuser, Architecture-based Change Impact Analysis in Cross-disciplinary Automated Production Systems, *The Journal of Systems & Software* (2018), doi: <https://doi.org/10.1016/j.jss.2018.08.058>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Metamodel for modeling the structure of an automated production system
- Metamodel to represent maintenance-relevant annotations to structural elements
- Metamodel for specifying seed modifications and the propagation of changes
- Algorithms for change propagation which results in more comprehensive analysis
