One-step synthesis of novel Fe₃C@nitrogen-doped carbon nanotubes/graphene nanosheets for catalytic degradation of Bisphenol A in the presence of peroxy-monosulfate

Wenjie Ma, Na Wang, Yunchen Du, Tianze Tong, Leijiang Zhang, Kun-Yi Andrew Lin, Xijiang Han

PII: S1385-8947(18)31810-2
DOI: <https://doi.org/10.1016/j.cej.2018.09.093>
Reference: CEJ 19932

To appear in: *Chemical Engineering Journal*

Received Date: 20 June 2018
Revised Date: 10 September 2018
Accepted Date: 12 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

One-step synthesis of novel Fe₃C@nitrogen-doped carbon nanotubes/graphene nanosheets for catalytic degradation of Bisphenol A in the presence of peroxymonosulfate
