Litopenaeus vannamei heat shock protein 70 (LvHSP70) enhances resistance to a strain of *Vibrio parahaemolyticus*, which can cause acute hepatopancreatic necrosis disease (AHPND), by activating shrimp immunity

Wisarut Junprung, Premruethai Supungul, Anchalee Tassanakajon

PII: S0145-305X(18)30432-4

DOI: 10.1016/j.dci.2018.09.011

Reference: DCI 3258

To appear in: *Developmental and Comparative Immunology*

Received Date: 18 August 2018

Accepted Date: 17 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

***Litopenaeus vannamei* heat shock protein 70 (LvHSP70) enhances resistance to a strain of *Vibrio parahaemolyticus*, which can cause acute hepatopancreatic necrosis disease (AHPND), by activating shrimp immunity**
