Theoretical investigations of phases of AIAs by first-principles

Chuanshuai Zhu , Ruike Yang , Qun Wei , Dongyun Zhang

PII: S0577-9073(18)30697-X
DOI: <https://doi.org/10.1016/j.cjph.2018.09.010>
Reference: CJPH 631

To appear in: *Chinese Journal of Physics*

Received date: 15 May 2018
Revised date: 8 July 2018
Accepted date: 6 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Five potential novel phases of AIAs are proposed.
- The electronic properties are calculated by hybrid functional.
- $Pmn2_1$ -AIAs and $Pbam$ -AIAs have direct band gaps.
