Synchronization of asynchronous probabilistic Boolean network

Zhang Hao, Wang Xing-yuan, Rui Li

PII: S0577-9073(18)30709-3
DOI: <https://doi.org/10.1016/j.cjph.2018.09.007>
Reference: CJPH 626

To appear in: *Chinese Journal of Physics*

Received date: 17 May 2018
Revised date: 5 September 2018
Accepted date: 5 September 2018

Please cite this article as: Zhang Hao, Wang Xing-yuan, Rui Li, Synchronization of asynchronous probabilistic Boolean network, *Chinese Journal of Physics* (2018), doi: <https://doi.org/10.1016/j.cjph.2018.09.007>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Asynchronous updating scheme of the Boolean network model is more universal
- Synchronization behaviors in probabilistic Boolean network are more complex
- Semi-tensor product translates logical problems into solvable mathematical matrices
- Both inner synchronization and outer synchronization are taken into consideration
