This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- The (2+1) dimensional conformable time fractional Zoomeron equation is studied.
- Two analytical techniques are applied for solving time fractional Zoomeron equation.
- New exact hyperbolic, trigonometric and exponential function solutions are derived.
