

## Accepted Manuscript

Variability of local stress states resulting from the application of Monte Carlo and finite difference methods to the stability study of a selected slope

Pasculli Antonio, Calista Monia, Sciarra Nicola

PII: S0013-7952(17)31560-0  
DOI: doi:[10.1016/j.enggeo.2018.09.009](https://doi.org/10.1016/j.enggeo.2018.09.009)  
Reference: ENGEO 4935  
To appear in: *Engineering Geology*  
Received date: 28 October 2017  
Revised date: 4 September 2018  
Accepted date: 5 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Variability of local stress states resulting from the application of Monte Carlo and finite difference methods to the stability study of a selected slope
