Improving the properties of recycled concrete aggregate with bio-deposition approach

Chun-Ran Wu, Ya-Guang Zhu, Xiao-Tong Zhang, Shi-Cong Kou

PII: S0958-9465(18)30592-4

DOI: [10.1016/j.cemconcomp.2018.09.012](https://doi.org/10.1016/j.cemconcomp.2018.09.012)

Reference: CECO 3142

To appear in: *Cement and Concrete Composites*

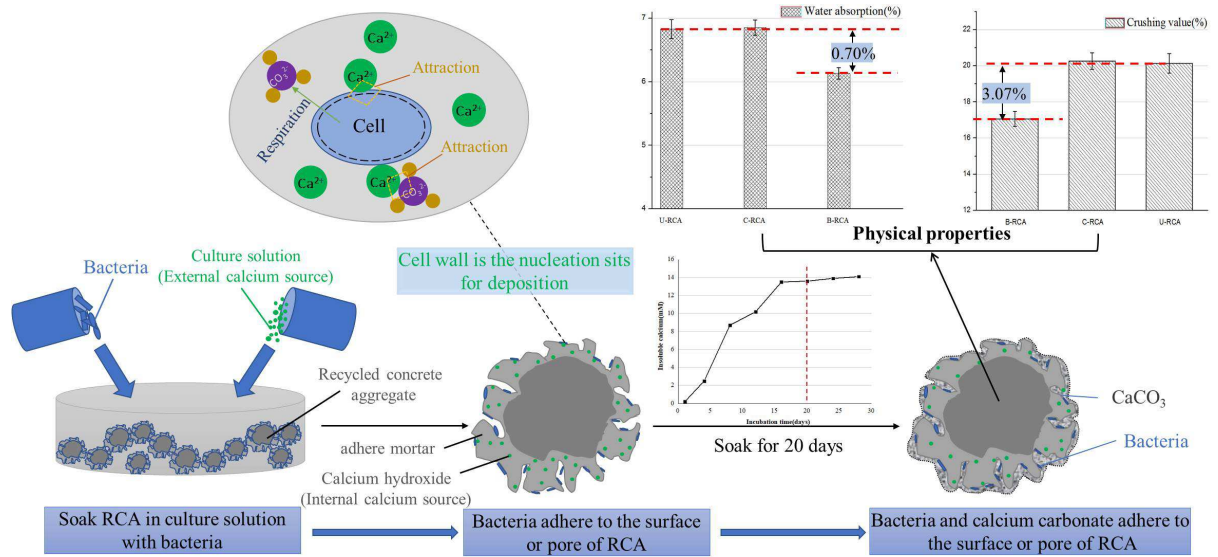

Received Date: 8 June 2018

Revised Date: 30 August 2018

Accepted Date: 17 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Note: bacteria can obtain calcium source from culture solution(external calcium source) and adhere mortars(internal calcium source).
