

## Accepted Manuscript

Title: CK2 Inhibition Protects White Matter from Ischemic Injury

Authors: Selva Baltan, Chinthasagar Bastian, John Quinn, Danielle Aquila, Andrew McCray, Sylvain Brunet

PII: S0304-3940(18)30554-8  
DOI: <https://doi.org/10.1016/j.neulet.2018.08.021>  
Reference: NSL 33756

To appear in: *Neuroscience Letters*

Received date: 26-6-2018  
Revised date: 13-8-2018  
Accepted date: 14-8-2018

Please cite this article as: Baltan S, Bastian C, Quinn J, Aquila D, McCray A, Brunet S, CK2 Inhibition Protects White Matter from Ischemic Injury, *Neuroscience Letters* (2018), <https://doi.org/10.1016/j.neulet.2018.08.021>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## CK2 Inhibition Protects White Matter from Ischemic Injury

Number of figures = 3

Number of tables = 0

Number of words: Abstract (182), Review (2827),

**Running Title:** CK2 Inhibition Protects White Matter from Ischemic Injury.

**Acknowledgements:** This work was supported by grants from NIA (AG033720) to S.B and NINDS (NS094881) to S.B and S.B.

Highlights WM components express abundant levels of the CK2 $\alpha$  subunit.

- CK2 signaling differentially regulates the CDK5 and AKT/GSK3 $\beta$  signaling pathways to mediate WM ischemic injury.
