This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Understanding Facial Expressivity in Autism Spectrum Disorder: An Inside Out Review of the Biological Basis and Clinical Implications

Stephen I. Deutsch, M.D., Ph.D.* deuschsi@evms.edu, C. Teal Raffaele, M.A.

¹Department of Psychiatry and Behavioral Sciences, Eastern Virginia Medical School, Norfolk, Virginia

*Corresponding author at: Anne Armistead Robinson Endowed Chair in Psychiatry, Professor and Chairman, Department of Psychiatry and Behavioral Sciences, Eastern Virginia Medical School, 825 Fairfax Avenue, Suite 710, Norfolk, Virginia 23507-1912

Acknowledgments: The senior author (SID) acknowledges with affection the outstanding training and mentoring that he received from Dr. Magda Campbell during his research fellowship on the historic PQ6 Children's Psychiatric Unit in New York's Bellevue Psychiatric Hospital and throughout his subsequent academic career. Dr. Campbell approached all of her work with kindness, candor, rigor and integrity. Importantly, throughout her tenure on NYU's faculty, Dr. Campbell personally evaluated every patient enrolled in her clinical studies and admitted to her special therapeutic nursery!

Declarations of interest: none

Disclosure: SID and CTR shared responsibility for conceptualizing the Review and determining the points to be emphasized, consistent with the aims of the Special Issue.
