The potential role of adenosine signaling in the pathogenesis of melanoma

Amirhossein Bahreyni, Melika Rezaei, Majid Khazaei, Hamid Fuji, Gordon A Ferns, Mikhail Ryzhikov, Amir Avan, Seyed Mahdi Hassanian

PII: S0006-2952(18)30400-3  
DOI: <https://doi.org/10.1016/j.bcp.2018.09.018>  
Reference: BCP 13297

To appear in: *Biochemical Pharmacology*

Received Date: 31 May 2018  
Accepted Date: 12 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
