Simulation and optimization of water supply and demand balance in Shenzhen: A system dynamics approach

Li Tianhong, Yang Songnan, Tan Mingxin

PII: S0959-6526(18)33066-X

DOI: [10.1016/j.jclepro.2018.10.052](https://doi.org/10.1016/j.jclepro.2018.10.052)

Reference: JCLP 14454

To appear in: *Journal of Cleaner Production*

Received Date: 12 June 2018

Revised Date: 15 September 2018

Accepted Date: 6 October 2018

Please cite this article as: Tianhong L, Songnan Y, Mingxin T, Simulation and optimization of water supply and demand balance in Shenzhen: A system dynamics approach, *Journal of Cleaner Production* (2018), doi: <https://doi.org/10.1016/j.jclepro.2018.10.052>.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Simulation and optimization of water supply and demand balance in Shenzhen: A System Dynamics approach
