Interactions of B12N12 fullerenes on graphene and boron nitride nanosheets: A DFT study

J. Carreto Escobar, M. Salazar Villanueva, A. Bautista Hernández, D. Cortés-Arriagada, E. Chigo Anota

PII: S1093-3263(18)30474-1

DOI: [10.1016/j.jmglm.2018.10.003](https://doi.org/10.1016/j.jmglm.2018.10.003)

Reference: JMG 7241

To appear in: *Journal of Molecular Graphics and Modelling*

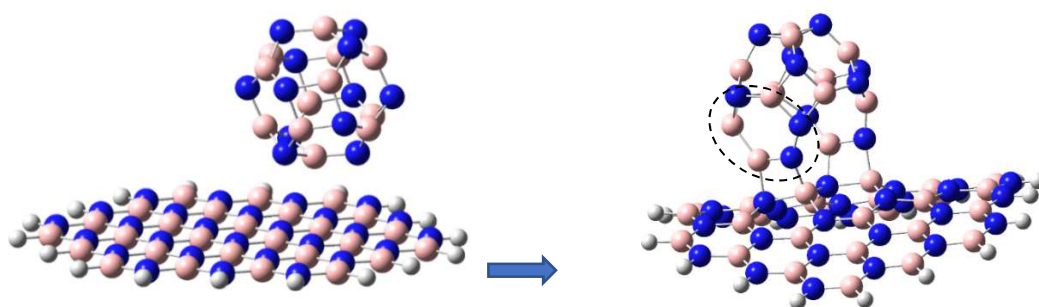

Received Date: 29 June 2018

Revised Date: 12 September 2018

Accepted Date: 4 October 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

When considering homonuclear bonds in B<sub>12</sub>N<sub>12</sub> fullerene, adsorption on the surface of the sheet is improved.
