

Accepted Manuscript

Title: Stable and Highly Efficient Cu/TiO₂ Nanocomposite Photocatalyst Prepared through Atomic Layer Deposition

Authors: Feng Gao, Jie Jiang, Liyong Du, Xinfang Liu, Yuqiang Ding

PII: S0926-860X(18)30496-4
DOI: <https://doi.org/10.1016/j.apcata.2018.10.006>
Reference: APCATA 16835

To appear in: *Applied Catalysis A: General*

Received date: 6-7-2018
Revised date: 27-9-2018
Accepted date: 4-10-2018

Please cite this article as: Gao F, Jiang J, Du L, Liu X, Ding Y, Stable and Highly Efficient Cu/TiO₂ Nanocomposite Photocatalyst Prepared through Atomic Layer Deposition, *Applied Catalysis A, General* (2018), <https://doi.org/10.1016/j.apcata.2018.10.006>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Stable and Highly Efficient Cu/TiO₂ Nanocomposite Photocatalyst Prepared through Atomic Layer Deposition
