

## Accepted Manuscript

Experimental and numerical investigation on the isobaric heat capacity for methylcyclohexane at high temperature and high pressure

Penghao Liu, Xinke Gao, Tianhao Zhang, Quan Zhu, Jianli Wang, Xiangyuan Li

PII: S1359-4311(16)33649-3

DOI: <https://doi.org/10.1016/j.applthermaleng.2018.10.012>

Reference: ATE 12756

To appear in: *Applied Thermal Engineering*

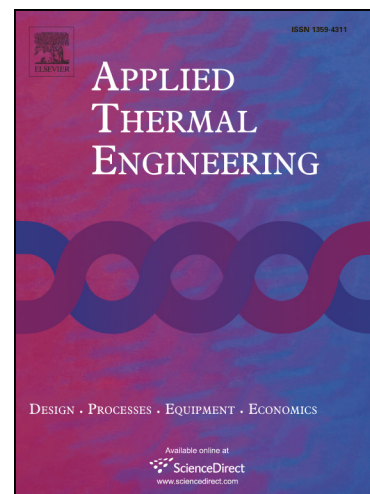

Received Date: 26 November 2016

Revised Date: 20 August 2018

Accepted Date: 2 October 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Experimental and numerical investigation on the isobaric heat capacity for  
methylcyclohexane at high temperature and high pressure
