Development of non-brittle fracture in SiC_f/SiC composites without a fiber/matrix interface due to the porous structure of the matrix

Kazuya Shimoda, Tatsuya Hinoki, Yi-Hyun Park

PII: S1359-835X(18)30393-2

DOI: <https://doi.org/10.1016/j.compositesa.2018.10.005>

Reference: JCOMA 5205

To appear in: *Composites: Part A*

Received Date: 5 June 2018

Revised Date: 6 August 2018

Accepted Date: 3 October 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title:

Development of non-brittle fracture in SiC_f/SiC composites without a fiber/matrix interface due to the porous structure of the matrix
