

## LIST OF CONTENTS

## VOLUME 63

## ISSUE 1

## Research Articles

- M. O. Santos and B. Almada-Lobo**  
**D. Ben-Arieh and D. K. Gullipalli**  
**F. J. Martínez-de-Pisón, A. Sanz, E. Martínez-de-Pisón, E. Jiménez and D. Conti**  
**M. Khashei, M. Bijari and G. A. Raissi Ardali**  
**P. Parthanadee, J. Buddhakulsomsiri and P. Charnsethikul**  
**K. Govindan, A. Diabat and M. N. Popiuc**  
**V. B. Kreng, T. C. Wang and H. T. Wang**  
**L. Zhang and Y. Zhou**  
**L.-C. Ma**  
**X. Guan, X. Dai, B. Qiu and J. Li**  
**A. Chambari, S. H. A. Rahmati, A. A. Najafi and A. Karimi**  
**D. Terekhov, M. K. Doğru, U. Özen and J. C. Beck**  
**R. Ahmad and S. Kamaruddin**  
**C.-H. Park, Y.-D. Kim and B. Jeong**  
**M. Deypir, M. H. Sadreddini and S. Hashemi**  
**M. Li, H. Feng and F. Chen**  
**J. M. Lee and Y. H. Lee**  
**C.-H. Wu, J. T. Lin and W.-C. Chien**  
**W. Hachicha and A. Ghorbel**  
**Y. Yin, T. C. E. Cheng, D. Xu and C.-C. Wu**
- 1** Integrated pulp and paper mill planning and scheduling  
**13** Data Envelopment Analysis of clinics with sparse data: Fuzzy clustering approach  
**22** Mining association rules from time series to explain failures in a hot-dip galvanizing steel line  
**37** Hybridization of autoregressive integrated moving average (ARIMA) with probabilistic neural networks (PNNs)  
**46** A study of replacement rules for a parallel fleet replacement problem based on user preference utilization pattern and alternative fuel considerations  
**58** Contract analysis: A performance measures and profit evaluation within two-echelon supply chains  
**75** Tripartite dynamic competition and equilibrium analysis on global television market  
**82** A new approach to supply chain network equilibrium models  
**89** A two-phase case-based distance approach for multiple-group classification problems  
**98** A revised electromagnetism-like mechanism for layout design of reconfigurable manufacturing system  
**109** A bi-objective model to optimize reliability and cost of system with a choice of redundancy strategies  
**120** Solving two-machine assembly scheduling problems with inventory constraints  
**135** An overview of time-based and condition-based maintenance in industrial application  
**150** Heuristics for determining a patrol path of an unmanned combat vehicle  
**161** Towards a variable size sliding window model for frequent itemset mining over data streams  
**173** Optimal versioning and pricing of information products with considering or not common valuation of customers  
**184** Facility location and scale decision problem with customer preference  
**192** Dynamic production control in parallel processing systems under process queue time constraints  
**204** A survey of control-chart pattern-recognition literature (1991–2010) based on a new conceptual classification scheme  
**223** Common due date assignment and scheduling with a rate-modifying activity to minimize the due date, earliness, tardiness, holding, and batch delivery cost

<b>J. E. Ramirez-Marquez and C. M. Rocco</b>	<b>235</b>	Vulnerability based robust protection strategy selection in service networks
<b>C. Yang, X. Wang and Z. Li</b>	<b>243</b>	An optimization approach for coupling problem of berth allocation and quay crane assignment in container terminal
<b>R. Eslami, M. Khodabakhshi, G. R. Jahanshahloo, F. Hosseinzadeh Lotfi and M. Khoveyni</b>	<b>254</b>	Estimating most productive scale size with imprecise-chance constrained input–output orientation model in data envelopment analysis
<b>L. Zhen and D.-F. Chang</b>	<b>262</b>	A bi-objective model for robust berth allocation scheduling
<b>W. W. Nasr, M. K. Salameh and L. Moussawi-Haidar</b>	<b>274</b>	Transshipment and safety stock under stochastic supply interruption in a production system
<b>H.-J. Chang, R.-H. Su, C.-T. Yang and M.-W. Weng</b>	<b>285</b>	An economic manufacturing quantity model for a two-stage assembly system with imperfect processes and variable production rate
<b>J. Fredin, A. Jönsson and G. Broman</b>	<b>294</b>	Holistic methodology using computer simulation for optimisation of machine tools
<b>Y.-H. Chung and L.-I. Tong</b>	<b>302</b>	Bi-criteria minimization for the permutation flowshop scheduling problem with machine-based learning effects
<b>M. Yin and K. H. Kim</b>	<b>313</b>	Quantity discount pricing for container transportation services by shipping lines
<b>S. Sikström and M. Y. Jaber</b>	<b>323</b>	The Depletion–Power–Integration–Latency (DPIL) model of spaced and massed repetition
<b>G. Yari and A. R. Chaji</b>	<b>338</b>	Maximum Bayesian entropy method for determining ordered weighted averaging operator weights
<b>L. Bai, C. Alexopoulos, M. E. Ferguson and K.-L. Tsui</b>	<b>343</b>	A simple and robust batch-ordering inventory policy under incomplete demand knowledge
<b>Corrigendum</b>		
<b>K. Shin, Y. Shin, J.-H. Kwon and S.-H. Kang</b>	<b>354</b>	Corrigendum to “Development of risk based dynamic backorder replenishment planning framework using Bayesian Belief Network” [Computers & Industrial Engineering 62 (2012) 716–725]

## ISSUE 2

### Research Articles

<b>F. Ahmadizar</b>	<b>355</b>	A new ant colony algorithm for makespan minimization in permutation flow shops
<b>S. H. Choi and K. Wang</b>	<b>362</b>	Flexible flow shop scheduling with stochastic processing times: A decomposition-based approach
<b>C.-W. Chen</b>	<b>374</b>	Using geometric Poisson exponentially weighted moving average control schemes in a compound Poisson production environment
<b>Y. H. Hwang and Y. H. Lee</b>	<b>382</b>	Uncapacitated single allocation $p$ -hub maximal covering problem
<b>C. Park and J. Seo</b>	<b>390</b>	A GRASP approach to transporter scheduling and routing at a shipyard
<b>S. A. Abbasi, M. Riaz and A. Miller</b>	<b>400</b>	Enhancing the performance of CUSUM scale chart
<b>C.-I. Hsu, C.-C. Chao and K.-Y. Shih</b>	<b>410</b>	Dynamic allocation of check-in facilities and dynamic assignment of passengers at air terminals
<b>F. Nasri, J. Paknejad and J. F. Affisco</b>	<b>418</b>	An analysis of flexibility and quality improvement in a quality-adjusted EOQ model with finite-range stochastic lead-time
<b>G. Wang, G. Ziyu and W. Zhongping</b>	<b>428</b>	A global optimization algorithm for solving the bi-level linear fractional programming problem
<b>E. B. Edis and C. Oguz</b>	<b>433</b>	Parallel machine scheduling with flexible resources
<b>H. D. Purnomo, H. M. Wee and Y. Praharsi</b>	<b>448</b>	Two inventory review policies on supply chain configuration problem
<b>Y. Duan, J. Huo, Y. Zhang and J. Zhang</b>	<b>456</b>	Two level supply chain coordination with delay in payments for fixed lifetime products
<b>S. Yan, S.-S. Wang and M.-W. Wu</b>	<b>464</b>	A model with a solution algorithm for the cash transportation vehicle routing and scheduling problem
