Workshop on Mathematical Biology and Numerical Analysis
Date: August 01–02, 2009
Place: Georgia Center, UGA

This workshop is organized by the UGA Institute of Bioinformatics (IOB) in association with the "IMACS World Congress Conference on Computational and Applied Mathematics and Applications in science and Engineering"
(www.uga.edu/imacs/), which will be held at UGA on August 03–05, 2009.
 NSF has recommended funding to support students and postdocs to participate in this workshop. The objective of this workshop is to give interdisciplinary education, training and research in the mathematical and biological sciences.
It will provide the participants with an overview of the necessary mathematical and biological background that are essential for a good number of applications in biological sciences.

The number of funded participants will be between 30 and 40.
This is based on the level of funding that NSF will provide.
