The role of triiodothyronine hormone and mechanically-stressed endothelial cell paracrine signalling synergism in gene reprogramming during hBMSC-stimulated osteogenic phenotype *in vitro*

Rodrigo A. da Silva, Amanda Fantini de Camargo Andrade, Geórgia da Silva Feltran, Célio Júnior da C. Fernandes, Rahyza Inacio F. de Assis, Marcel Rodrigues Ferreira, Denise C. Andia, Willian F. Zambuzzi

PII: S0303-7207(18)30251-X

DOI: [10.1016/j.mce.2018.08.008](https://doi.org/10.1016/j.mce.2018.08.008)

Reference: MCE 10286

To appear in: *Molecular and Cellular Endocrinology*

Received Date: 7 March 2018

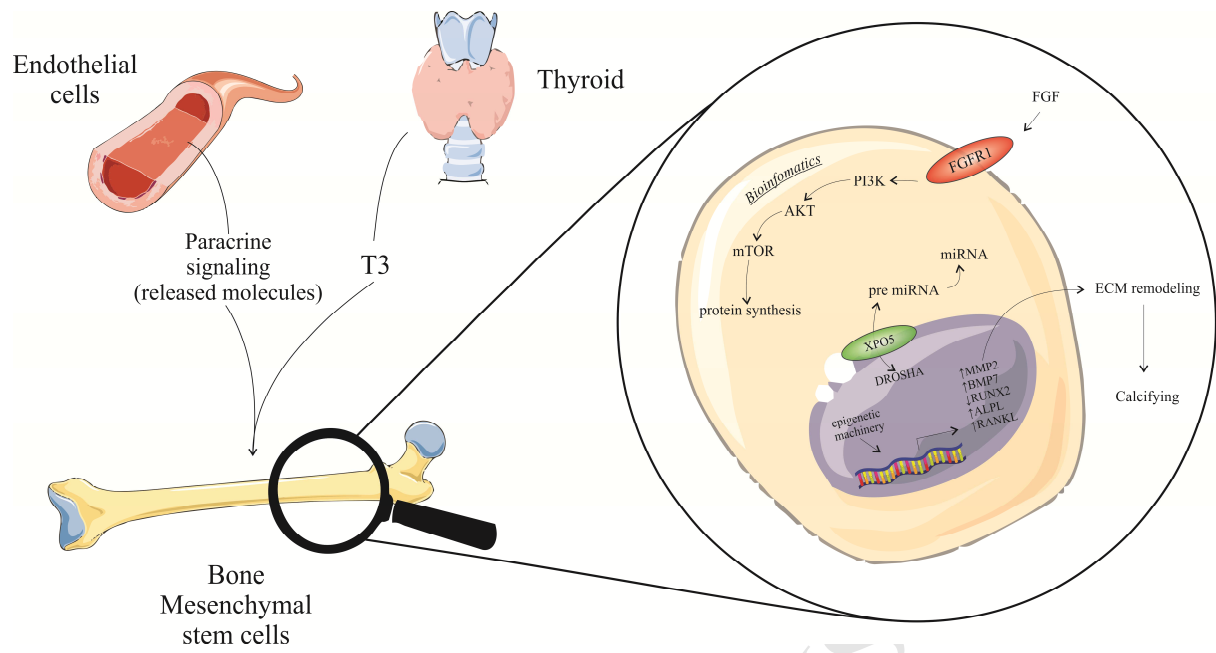

Revised Date: 19 August 2018

Accepted Date: 20 August 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
