

## Accepted Manuscript

Charge transport mechanism under applied DC electric field in plasma polymerized diethanolamine thin films prepared by a capacitively coupled reactor

Nasima Banu, A.H. Bhuiyan

PII: S0040-6090(18)30659-X  
DOI: [doi:10.1016/j.tsf.2018.09.053](https://doi.org/10.1016/j.tsf.2018.09.053)  
Reference: TSF 36915  
To appear in: *Thin Solid Films*  
Received date: 9 April 2018  
Revised date: 9 September 2018  
Accepted date: 28 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Charge transport mechanism under applied DC electric field in plasma polymerized diethanolamine thin films prepared by a capacitively coupled reactor
