In-situ N-doped MnCO₃ anode material via one-step solvothermal synthesis: doping mechanisms and enhanced electrochemical performances

Mengjiao Liu, Qin Wang, Zhiyao Liu, Yan Zhao, Xin Lai, Jian Bi, Daojiang Gao

PII: S1385-8947(19)32573-2
DOI: <https://doi.org/10.1016/j.cej.2019.123161>
Reference: CEJ 123161

To appear in: *Chemical Engineering Journal*

Received Date: 10 July 2019
Revised Date: 13 September 2019
Accepted Date: 12 October 2019

This is a PDF file of an article that has undergone enhancements after acceptance, such as the addition of a cover page and metadata, and formatting for readability, but it is not yet the definitive version of record. This version will undergo additional copyediting, typesetting and review before it is published in its final form, but we are providing this version to give early visibility of the article. Please note that, during the production process, errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
