Revised date : 7 November 2019

Please cite this article as: H. Agahi and M. Alipour, Tsallis-Mittag-Leffler distribution and its applications in gas prices, *Physica A* (2019), doi: <https://doi.org/10.1016/j.physa.2019.123675>.

This is a PDF file of an article that has undergone enhancements after acceptance, such as the addition of a cover page and metadata, and formatting for readability, but it is not yet the definitive version of record. This version will undergo additional copyediting, typesetting and review before it is published in its final form, but we are providing this version to give early visibility of the article. Please note that, during the production process, errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

© 2019 Published by Elsevier B.V.

- Tsallis-Mittag-Leffler distribution is introduced.
- Our results include some well-known q -distributions.
- A real data set on daily Henry Hub Natural (HHN) gas price is analyzed.
- An application in time series data based on 100 days moving average is given.
