This is a PDF file of an article that has undergone enhancements after acceptance, such as the addition of a cover page and metadata, and formatting for readability, but it is not yet the definitive version of record. This version will undergo additional copyediting, typesetting and review before it is published in its final form, but we are providing this version to give early visibility of the article. Please note that, during the production process, errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- Synthesised a few novel Michael adducts
- Compare the reactivity of Michael adducts in *polar protic media-acetic acid and methanol*
- *Michael adducts show high reactivity in polar protic medium-acetic acid*
