European Journal of Medicinal Chemistry Vol 108, 2016

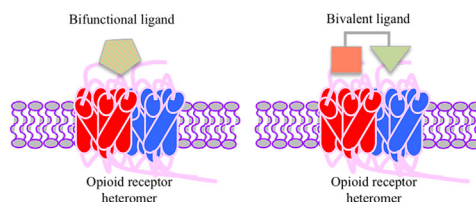

Graphical abstracts

REVIEW ARTICLES

Multitarget opioid ligands in pain relief: New players in an old game

pp. 211–228

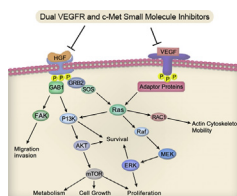

Rita Turnaturi*, Giuseppina Aricò, Giuseppe Ronsisvalle, Carmela Parenti and Lorella Pasquinucci

Recent advances in the development of dual VEGFR and c-Met small molecule inhibitors as anticancer drugs

pp. 495–504

Jin Zhang, Xiangdong Jiang, Yingnan Jiang, Mingrui Guo, Shouyue Zhang, Jingjing Li, Jun He, Jie Liu, Jinhui Wang** and Liang Ouyang*

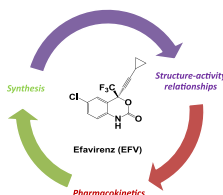

MINI-REVIEW

Efavirenz a nonnucleoside reverse transcriptase inhibitor of first-generation: Approaches based on its medicinal chemistry

pp. 455–465

Mônica M. Bastos, Carolina C.P. Costa, Talitha C. Bezerra, Fernando de C. da Silva and Núbia Boechat*

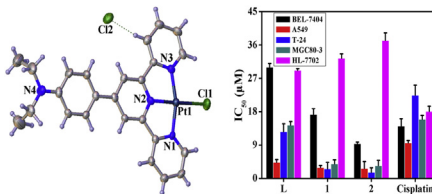

ORIGINAL ARTICLES

Preparation of 4-([2,2':6',2''-terpyridin]-4'-yl)-N,N-diethylaniline Ni^{II} and Pt^{II} complexes and exploration of their *in vitro* cytotoxic activities

pp. 1–12

Hua-Hong Zou*, Li Wang, Zhi-Xiang Long, Qi-Pin Qin**, Zhong-Kui Song, Tao Xie, Shu-Hua Zhang, Yan-Cheng Liu, Bin Lin and Zhen-Feng Chen

**4-Arylamino-6-nitroquinazolines: Synthesis and their activities against neglected disease leishmaniasis**

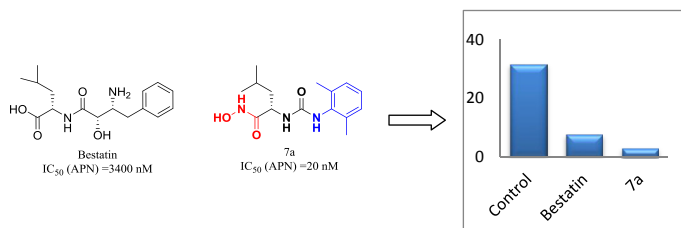

pp. 13–20

Syed Muhammad Saad, Nida Ghouri, Shahnaz Perveen, Khalid Mohammed Khan* and M. Iqbal Choudhary

**Novel leucine ureido derivatives as aminopeptidase N inhibitors. Design, synthesis and activity evaluation**

pp. 21–27

Chunhua Ma, Jiangying Cao, Xuewu Liang, Yongxue Huang, Ping Wu, Yingxia Li, Wenfang Xu and Yingjie Zhang*

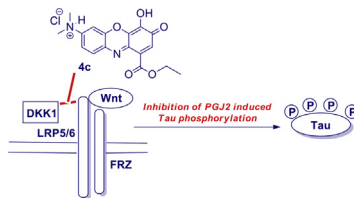

The result of *in vivo* H22 cell metastasis assay.

7a showed better activity than the positive control Bestatin in inhibiting tumor metastasis.

Synthesis and evaluation of gallocyanine dyes as potential agents for the treatment of Alzheimer's disease and related neurodegenerative tauopathies

pp. 28–38

Spyros Mpousis, Savvas Thysiadis, Nicolaos Avramidis, Sotirios Katsamakas, Spiros Efthimiopoulos** and Vasiliki Sarli*
