

Author's Accepted Manuscript

Maximizing the ultimate absorption efficiency of vertically-aligned semiconductor Nanowire arrays with wires of a low absorption cross-section

Gil Shalev, Sebastian Schmitt, Gerald Brönstrup, Silke Christiansen

PII: S2211-2855(15)00058-0
DOI: <http://dx.doi.org/10.1016/j.nanoen.2015.01.048>
Reference: NANOEN708

To appear in: *Nano Energy*

Received date: 27 November 2014

Revised date: 25 January 2015

Accepted date: 31 January 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Maximizing the ultimate absorption efficiency of vertically-aligned semiconductor nanowire arrays with wires of a low absorption cross-section
