

## Subject index of volume 474

- Activation energy  
Dynamic strain ageing of an austenitic superalloy—Temperature and strain rate effects, 363
- Al alloy  
Hard and corrosion resistant nanocomposite coating for Al alloy, 181
- Aligned precipitates  
Remarkable improvement of shape memory effect in an Fe–Mn–Si–Cr–Ni–C alloy through controlling precipitation direction of  $\text{Cr}_{23}\text{C}_6$ , 60
- Alloy C-276  
Dynamic strain ageing of an austenitic superalloy—Temperature and strain rate effects, 363
- $\text{Al}_2\text{O}_3$   
Evaluation of the elastic modulus and strength of unsymmetrical  $\text{Al}_2\text{O}_3$  coating on  $\text{Ti}_3\text{SiC}_2$  substrate by a modified relative methodology, 64
- Annealing  
Mechanical anisotropy and construction of flow stress diagrams during the annealing of Zr–1% Sn alloy, 96  
Grain growth and texture evolution in electroformed copper liners of shaped charges, 208
- Anodizing thickness  
Effect of anodized layer thickness on fatigue behavior of magnesium alloy, 261
- Austenite stainless steel  
Reassessment of the effects of laser surface melting on IGC of SUS 304, 112
- Austenitizing temperature  
Influences of Co addition and austenitizing temperature on secondary hardening and impact fracture behavior in P/M high speed steels of W–Mo–Cr–V(–Co) system, 328
- Bainite  
Influence of bainite/martensite-content on the tensile properties of low carbon dual-phase steels, 270
- Biocompatibility  
Preparation and characterization of sol–gel bioactive glass coating for improvement of biocompatibility of human body implant, 128
- Bioglass coating  
Preparation and characterization of sol–gel bioactive glass coating for improvement of biocompatibility of human body implant, 128
- Bonding  
Floating of SiC particles in a Zn–Al filler metal, 157
- Boron additions  
Effect of boron additions on the microstructure and transverse properties of a directionally solidified superalloy, 39
- Boron carbide  
Wetting and interface interactions in the  $\text{B}_4\text{C}/\text{Al–Me}$  (Me=Cu, Sn) systems, 214
- Brazing alloy  
Wettability of Ni–V, Co–V, and Ni–Cr–V system brazing alloys on  $\text{Si}_3\text{N}_4$  ceramic and interfacial reactions, 376
- Carbide  
Effect of boron additions on the microstructure and transverse properties of a directionally solidified superalloy, 39
- Carbon steel  
Effect of carbon content on etching response for identification of plastic deformation zones in carbon steels, 140
- Casting  
Effect of C particle size on the porous formation of TiC particulate locally reinforced steel matrix composites via the SHS reaction of Ni–Ti–C system during casting, 355
- Cathodic arc  
Study of macrodroplet and growth mechanisms with and without ion etchings on the properties of TiN coatings deposited on HSS using cathodic arc physical vapour deposition technique, 236
- Cementite  
Effect of carbon content on etching response for identification of plastic deformation zones in carbon steels, 140
- Centrifugal casting  
A study on the crack control of a high-speed steel roll fabricated by a centrifugal casting technique, 82
- Ceramics  
Improved high-Q microwave dielectric material using  $\text{B}_2\text{O}_3$ -doped  $\text{MgNb}_2\text{O}_6$  ceramics, 243  
Effect of C particle size on the porous formation of TiC particulate locally reinforced steel matrix composites via the SHS reaction of Ni–Ti–C system during casting, 355
- Cerium  
Effects of cerium on the microstructure and mechanical properties of Mg–20Zn–8Al alloy, 317
- Co addition  
Influences of Co addition and austenitizing temperature on secondary hardening and impact fracture behavior in P/M high speed steels of W–Mo–Cr–V(–Co) system, 328
- Compression test  
The effect of strain rate on the compressive deformation behavior of a sintered Ti6Al4V powder compact, 335
- Compressive properties  
High strain rate behavior of woven fabric composites under compressive loading, 301
- Copper  
Grain growth and texture evolution in electroformed copper liners of shaped charges, 208  
Evolution of defect structures during cold rolling of ultrafine-grained Cu and Cu–Zn alloys: Influence of stacking fault energy, 342

- Copper–zinc alloys
  - Evolution of defect structures during cold rolling of ultrafine-grained Cu and Cu–Zn alloys: Influence of stacking fault energy, 342
- Corrosion
  - Hard and corrosion resistant nanocomposite coating for Al alloy, 181
- Corrosion behavior
  - Preparation and characterization of sol–gel bioactive glass coating for improvement of biocompatibility of human body implant, 128
- Crack
  - A study on the crack control of a high-speed steel roll fabricated by a centrifugal casting technique, 82
- Crack growth rate
  - Initiation and growth of micro-cracks under cyclic loading, 48
- Crack initiation
  - Initiation and growth of micro-cracks under cyclic loading, 48
- Creep
  - Effect of boron additions on the microstructure and transverse properties of a directionally solidified superalloy, 39
- Crumb rubber
  - A crumb rubber modified syntactic foam, 390
- Damage
  - Effects of microcrack-damage on fracture behavior of TiAl alloy part I displacement-controlled tensile test, 1
- Deformation mechanism
  - Compressive deformation behavior of a 30 vol.%ZrC<sub>p</sub>/W composite at temperatures of 1300–1600 °C, 382
- Design
  - Failure maps for rectangular 17-4PH stainless steel sandwiched foam panels, 88
- Dielectric
  - Improved high-Q microwave dielectric material using B<sub>2</sub>O<sub>3</sub>-doped MgNb<sub>2</sub>O<sub>6</sub> ceramics, 243
- Digital image analysis
  - Image based computations of lineal path probability distributions for microstructure representation, 104
- Disk
  - Effectiveness of shot peening in suppressing fatigue cracking at non-metallic inclusions in Udimet® 720, 71
- Dislocation density
  - Dynamic strain ageing of an austenitic superalloy—Temperature and strain rate effects, 363
- Dislocations
  - Modeling of size-dependent internal stresses in dislocation cell structures, 323
- Dual-phase steel
  - Influence of bainite/martensite-content on the tensile properties of low carbon dual-phase steels, 270
- Ductile fracture/failure
  - Effect of finite edge radius on ductile fracture ahead of the cutting tool edge in micro-cutting of Al2024-T3, 283
- Dynamic
  - Synthesis and compressive deformation of rapidly solidified magnesium alloy and composites reinforced by SiC<sub>p</sub>, 24
- Dynamic recovery and recrystallization
  - Compressive deformation behavior of a 30 vol.%ZrC<sub>p</sub>/W composite at temperatures of 1300–1600 °C, 382
- Dynamic recrystallization
  - The effect of Nb on recrystallization behavior of a Nb micro-alloyed steel, 254
- Dynamic strain aging
  - Experimental study by pyrometry of Portevin–Le Châtelier plastic instabilities—Type A to type B transition, 188
  - Dynamic strain ageing of an austenitic superalloy—Temperature and strain rate effects, 363
- EBS
  - Gradient matrix method to image crystal curvature by processing of EBSD data and trial recognition of low-angle boundaries in IF steel, 165
- Edge radius
  - Effect of finite edge radius on ductile fracture ahead of the cutting tool edge in micro-cutting of Al2024-T3, 283
- Elastic modulus
  - Evaluation of the elastic modulus and strength of unsymmetrical Al<sub>2</sub>O<sub>3</sub> coating on Ti<sub>3</sub>SiC<sub>2</sub> substrate by a modified relative methodology, 64
- Electrodeposition
  - Hard and corrosion resistant nanocomposite coating for Al alloy, 181
- Electroformation
  - Grain growth and texture evolution in electroformed copper liners of shaped charges, 208
- Etching technique
  - Effect of carbon content on etching response for identification of plastic deformation zones in carbon steels, 140
- Extrusion
  - Effects of extrusion on the microstructure and mechanical properties of Mg–Zn–Gd alloy reinforced with quasicrystalline particles, 348
- Fatigue
  - Effectiveness of shot peening in suppressing fatigue cracking at non-metallic inclusions in Udimet® 720, 71
- Fatigue behavior
  - Effect of anodized layer thickness on fatigue behavior of magnesium alloy, 261
- Fatigue crack propagation
  - Effect of thermal treatment on the fatigue crack propagation behavior of a new Ni-base superalloy, 30
- Fatigue threshold
  - Initiation and growth of micro-cracks under cyclic loading, 48
- Ferrite
  - Effect of carbon content on etching response for identification of plastic deformation zones in carbon steels, 140
- Finite element analysis
  - A crumb rubber modified syntactic foam, 390
- Finite element modeling
  - Optimization of the LENS® process for steady molten pool size, 148
- Flow surface
  - Mechanical anisotropy and construction of flow stress diagrams during the annealing of Zr–1% Sn alloy, 96
- Foam
  - A crumb rubber modified syntactic foam, 390
- Fracture behavior
  - Effects of microcrack-damage on fracture behavior of TiAl alloy part I displacement-controlled tensile test, 1
- Fracture toughness
  - Modeling the fracture toughness and tensile ductility of SiC<sub>p</sub>/Al metal matrix composites, 371
- Glass–metal joint
  - Microscopy and strength of borosilicate glass-to-Kovar alloy joints, 218
- Grain
  - Recrystallization behaviour of SnAgCu solder joints, 201
- Grain boundary character distribution
  - Reassessment of the effects of laser surface melting on IGC of SUS 304, 112
- Grain growth
  - Grain growth and texture evolution in electroformed copper liners of shaped charges, 208
- Grain refinement
  - Microstructure of fine-grained β-type titanium alloy produced by mechanical alloying and consolidation process, 120
