

## Accepted Manuscript

Title: Characterization of senescence-associated protease activities involved in the efficient protein remobilization during leaf senescence of winter oilseed rape

Author: Marine Poret Balakumaran Chandrasekar Renier  
A.L. van der Hoorn Jean-Christophe Avice

PII: S0168-9452(16)30023-1  
DOI: <http://dx.doi.org/doi:10.1016/j.plantsci.2016.02.011>  
Reference: PSL 9366

To appear in: *Plant Science*

Received date: 20-11-2015  
Revised date: 8-2-2016  
Accepted date: 11-2-2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Characterization of senescence-associated protease activities involved in the efficient protein remobilization during leaf senescence of winter oilseed rape**
