

Index

Note: Page numbers of article titles are in **boldface** type.

A

- Advanced practice registered nurse (APRN), proof-of-concept implementation of unit-based role, **1–13**
 - components of team development, 8–10
 - data collection, 10–11
 - definition of, 4–5
 - stages of team development, 10
 - structural empowerment, 3–4
 - team development components and solidification, 11–12
 - team effectiveness, 5–8
 - Vanderbilt Anticipatory Care Team, 2–3
- Anticipatory care, with unit-based APRN role, 2–3
- APRN. *See* Advanced practice registered nurse.

C

- Cancer, colorectal, measuring endoscopic performance for quality improvement in prevention of, **15–27**
- Catheter-associated urinary tract infection, diagnosis and treatment in adult neurocritical care patients, **29–43**
 - appraisal of evidence and synthesis, 31–35
 - background and significance, 29–30
 - benefit to practice, 30–31
 - conceptual framework, 31
 - dissemination of project, 40
 - future directions of project, 40
 - practice setting, 30
 - project results, 35–40
 - purpose and specific aims, 30
- Clinical competency, bridging gap between theory and, **69–80**
 - combining the education strategies, 75–78
 - for hospital staff development, 78
 - in graduate education, 75–78
 - in undergraduate education, 78
 - concept mapping, 72–74
 - meaningful learning, 71–72
 - nurse-sensitive indicators, 70–71
 - simulation, 75
- Clinical practice guidelines, for behavioral problems in long-term care residents with dementia, **105–113**
 - applicability to advanced practice, 111
 - application of theory and framework, 109–110

Clinical (*continued*)

- background and significance, 106–107
 - methodology, 110–111
 - project results, 111
 - purpose, 106
 - statement of problem, 105–106
 - synthesis of evidence, 107–108
- Colonoscopy. *See* Colorectal cancer prevention.
- Colorectal cancer prevention, measuring endoscopic performance for quality improvement (QI) in, **15–27**
- application of theoretical framework for, 19–22
 - methodology, 19–21
 - results, 21–22
 - background and significance, 16
 - discussion, 22–24
 - impact of results on practice, 23
 - recommendations for practice, 24
 - strengths and limitations, 23–24
 - synthesis of evidence related to problem, 16–19
 - adenoma detection rate in screening, 18–19
 - cecal intubation rates, 18
 - colonoscope withdrawal time, 19
 - initial CRC risk assessment, 17–18
 - QI in health care, 16–17
 - quality of bowel preparation, 18
 - use of recommended surveillance, 18
- Communication, Web-based patient-provider messaging system in military psychiatric outpatient clinic, 91–103
- Competency. *See* Clinical competency.
- Compliance, with core measures, using dedicated nurses to improve, **45–51**
- discussion, 46–50
 - problem, 46
 - summary, 50–51
- Concept mapping, in bridging gap between theory and clinical competency, **69–80**
- combining the education strategies, 75–78
 - for hospital staff development, 78
 - in graduate education, 75–78
 - in undergraduate education, 78
 - meaningful learning, 71–72
 - nurse-sensitive indicators, 70–71
 - simulation, 75
- Core measures, using dedicated nurses to improve compliance with, **45–51**
- discussion, 46–50
 - problem, 46
 - summary, 50–51
- Critical care nursing, reducing skin breakdown in patients on extracorporeal membranous oxygenation, **61–68**

D

- Dementia, clinical practice guidelines for behavioral problems in long-term care residents, **105–113**
