Preface

S. Murakami, M. Matsumoto, Y. Tamura	1449
--	------

Keynote papers

Towards practical use of LES in wind engineering T. Tamura	1451
Numerical simulation of wind effects: A probabilistic perspective A. Kareem	1472
Prediction of wind environment and thermal comfort at pedestrian level in urban area A. Mochida, I.Y.F. Lun	1498
Prediction of the flow over a circular cylinder at high Reynolds number using detached-eddy simulation K.D. Squires, V. Krishnan, J.R. Forsythe	1528
Some developments in turbulence modeling for wind and environmental engineering K. Hanjalić, S. Kenjereš	1537
Computational modelling for wind energy assessment K.W. Ayotte	1571

Wind environment

Development of a wind environment database in Tokyo for a comprehensive assessment system for heat island relaxation measures M. Oguro, Y. Morikawa, S. Murakami, K. Matsunawa, A. Mochida, H. Hayashi	1591
Modeling transient snowdrift development around complex three-dimensional structures M. Beyers, B. Waechter	1603
Application of generalized Richardson extrapolation to the computation of the flow across an asymmetric street intersection J. Franke, W. Frank	1616
A new method to select appropriate countermeasures against heat-island effects according to the regional characteristics of heat balance mechanism K. Sasaki, A. Mochida, H. Yoshino, H. Watanabe, T. Yoshida	1629
Analysis of regional characteristics of the atmospheric heat balance in the Tokyo metropolitan area in summer T. Sato, S. Murakami, R. Ooka, S. Yoshida	1640

Calculation of wind in a Tokyo urban area with a mesoscale model including a multi-layer urban canopy model	
H. Kondo, T. Tokairin, Y. Kikegawa	1655
Examining tree canopy models for CFD prediction of wind environment at pedestrian level	
A. Mochida, Y. Tabata, T. Iwata, H. Yoshino	1667
Analysis of wind-induced inflow and outflow through a single opening using LES & DES	
T. Hasama, S. Kato, R. Ooka	1678
CFD modelling of unsteady cross ventilation flows using LES	
C.-H. Hu, M. Ohba, R. Yoshie	1692
Numerical simulation studies of the different vegetation patterns' effects on outdoor pedestrian thermal comfort	
B. Lin, X. Li, Y. Zhu, Y. Qin	1707
Numerical and experimental study on convective heat transfer of the human body in the outdoor environment	
T. Ono, S. Murakami, R. Ooka, T. Omori	1719
Study on optimum arrangement of trees for design of pleasant outdoor environment using multi-objective genetic algorithm and coupled simulation of convection, radiation and conduction	
R. Ooka, H. Chen, S. Kato	1733
AIJ guidelines for practical applications of CFD to pedestrian wind environment around buildings	
Y. Tominaga, A. Mochida, R. Yoshie, H. Kataoka, T. Nozu, M. Yoshikawa, T. Shirasawa	1749
LES of the flow and building wall pressures in the center of Tokyo	
T. Nozu, T. Tamura, Y. Okuda, S. Sanada	1762
Dispersion	
CFD analysis on traffic-induced air pollutant dispersion under non-isothermal condition in a complex urban area in winter	
H. Huang, R. Ooka, H. Chen, S. Kato, T. Takahashi, T. Watanabe	1774
Protocol for CFD prediction of cooling-tower drift in an urban environment	
R.N. Meroney	1789
Bayesian inversion of concentration data: Source reconstruction in the adjoint representation of atmospheric diffusion	
E. Yee, F.-S. Lien, A. Keats, R. D'Amours	1805
Numerical evaluation of pollutant dispersion in the built environment: Comparisons between models and experiments	
B. Blocken, T. Stathopoulos, P. Saathoff, X. Wang	1817
Partially resolved numerical simulation and RANS modeling of flow and passive scalar transport in an urban environment	
F.-S. Lien, E. Yee, H. Ji, K.-J. Hsieh	1832
