Flexible Conversion Fast Reactors with Regular Papers

Guest Editors:
Neil Todreas
Pavel Hejzlar
Yassin Hassan

Special Section: Flexible Conversion Fast Reactors

Special Issue Papers

Flexible conversion fast reactors	
<i>N. Todreas, P. Hejzlar and Y. Hassan</i>	2581
Flexible conversion ratio fast reactors: Overview	
<i>N.E. Todreas, P. Hejzlar, A. Nikiforova, R. Petroski, E. Shwageraus, C.J. Fong, M.J. Driscoll, M.A. Elliott and G. Apostolakis</i>	2582
Lead-cooled flexible conversion ratio fast reactor	
<i>A. Nikiforova, P. Hejzlar and N.E. Todreas</i>	2596
Thermal hydraulic design of a liquid salt-cooled flexible conversion ratio fast reactor	
<i>R. Petroski, P. Hejzlar and N.E. Todreas</i>	2612
Liquid salt cooled flexible conversion ratio fast reactor: Neutronic design	
<i>E. Shwageraus, P. Hejzlar and M.J. Driscoll</i>	2626
Decay heat in fast reactors with transuranic fuels	
<i>E. Shwageraus and P. Hejzlar</i>	2646
Application of risk-informed design methods to select the PSACS ultimate heat sink	
<i>M.A. Elliott and G.E. Apostolakis</i>	2654
Reliability analysis of a passive cooling system using a response surface with an application to the flexible conversion ratio reactor	
<i>C.J. Fong, G.E. Apostolakis, D.R. Langewisch, P. Hejzlar, N.E. Todreas and M.J. Driscoll</i>	2660
Cross-comparison of fast reactor concepts with various coolants	
<i>P. Hejzlar, N.E. Todreas, E. Shwageraus, A. Nikiforova, R. Petroski and M.J. Driscoll</i>	2672

Regular Papers

Engineering Mechanics

Row of fuel assemblies analysis under seismic loading: Modelling and experimental validation	
<i>G. Ricciardi, S. Bellizzi, B. Collard and B. Cochelin</i>	2692
A study on the actuator efficiency behavior of safety-related motor operated gate and globe valves	
<i>S. Kang, S. Park, D. Lee, Y. Kim and D. Kim</i>	2705
Evaluation of stress corrosion cracking as a function of its resistance to eddy currents	
<i>N. Yusa and H. Hashizume</i>	2713

Low cycle fatigue behaviors of elbow pipe with local wall thinning <i>K. Takahashi, S. Watanabe, K. Ando, Y. Urabe, A. Hidaka, M. Hisatsune and K. Miyazaki</i>	2719
Measurements of the flow characteristics of the lateral flow in the 6×6 rod bundles with Tandem Arrangement Vanes <i>S.Y. Han, J.S. Seo, M.S. Park and Y.D. Choi</i>	2728
Experimental evaluation of the effect of local wall thinning on the failure pressure of elbows <i>J.W. Kim, S.H. Lee and C.Y. Park</i>	2737
<i>Material Properties</i>	
Phase characteristics of a U–20Pu–3Am–2Np–15Zr metallic alloy containing rare earths <i>D.E. Burkes, J. Rory Kennedy, T. Hartmann and C.A. Papesch</i>	2747
<i>Reactor Engineering</i>	
Thermal striping limits for components of sodium cooled fast spectrum reactors <i>P. Chellapandi, S.C. Chetal and B. Raj</i>	2754
Kinetic parameters of a material test research reactor fueled with various low enriched uranium dispersion fuels <i>F. Muhammad and A. Majid</i>	2766
Residual stress analysis of an Overlay weld and a repair weld on the dissimilar Butt weld <i>K.S. Kim, H.J. Lee, B.S. Lee, I.C. Jung and K.S. Park</i>	2771
Development of a safety analysis code for molten salt reactors <i>D. Zhang, S. Qiu and G. Su</i>	2778
Optimization of the core configuration design using a hybrid artificial intelligence algorithm for research reactors <i>A. Hedayat, H. Davilu, A.A. Barfrosh and K. Sepanloo</i>	2786
An optimization method based on combination of cellular automata and simulated annealing for VVER-1000 NPP loading pattern <i>A.H. Fadaei, S. Setayeshi and S. Kia</i>	2800
Thermal-hydraulic and neutronic analyses of the submersion-subcritical, safe space (S^4) reactor <i>J.C. King and M.S. El-Genk</i>	2809
<i>Fuel Engineering</i>	
The study on grid-to-rod fretting wear models for PWR fuel <i>K.-T. Kim</i>	2820
Enrichment of heavy water in thermal-diffusion columns connected in series <i>H.-M. Yeh and L.Y. Chen</i>	2825
<i>Reactor Components</i>	
Dismantling design for the loop rooms on the MR reactor <i>D. Craig, L. Fecitt, Yu.E. Gorlinsky, N.F. Harman, R. Jackson, V.I. Kolyadin, Yu.N. Lobach and V.I. Pavlenko</i>	2832
Acoustics impact on steam dryer induced by main steam line break in a boiling water reactor <i>J. Yan and F. Bolger</i>	2843
<i>Thermal Hydraulics</i>	
CFD simulation of steam jet-induced thermal mixing in subcooled water pool <i>Y.-T. Moon, H.-D. Lee and G.-C. Park</i>	2849
Void fraction and flow regime in adiabatic upward two-phase flow in large diameter vertical pipes <i>J.P. Schlegel, P. Sawant, S. Paranjape, B. Ozar, T. Hibiki and M. Ishii</i>	2864
Experimental validation of the thermal-hydraulic code SACATRI <i>O. Merroun, A. Al Mers, M.A. Veloso, T. El Bardouni, B. El Bakkari and E. Chakir</i>	2875
Subcooled boiling heat transfer in a short vertical SUS304-tube at liquid Reynolds number range 5.19×10^4 to 7.43×10^5 <i>K. Hata and S. Masuzaki</i>	2885
Use of the TREPAM hot wire quenching test results for modelling heat transfer between fuel and coolant in FCI codes <i>G. Berthoud</i>	2908
Application of flexibility model in modeling of flow boiling heat transfer <i>J. Peng and F. Zhao</i>	2916
Effect of automatic recirculation flow control on the transient response for Lungmen ABWR plant <i>Y.-C. Tzang, R.-F. Chiang, Y.-M. Ferng and B.-S. Pei</i>	2923
Evaluation of system codes for analyzing naturally circulating gas loop <i>J.I. Lee, H.C. No and P. Hejzlar</i>	2931
Analysis of a signal during bistable flow events in Laguna Verde Nuclear Power Station with wavelets techniques <i>A. Nuñez-Carrera, A. Prieto-Guerrero, E.-G. Espinosa-Martínez and G. Espinosa-Paredes</i>	2942
