

Journal of Vascular Surgery®

Anton N. Sidawy, Editor-in-Chief, Bruce A. Perler, Senior Editor

INFORMATION FOR AUTHORS SCOPE OF THE JOURNAL

The *Journal of Vascular Surgery*® is dedicated to the science and art of vascular surgery and aims to improve the management of patients with vascular diseases by publishing relevant papers that report important medical advances, test new hypotheses, and address current controversies. To achieve this goal, the *Journal* will publish original clinical and laboratory studies, and reports and papers that comment on the social, economic, ethical, legal, and political factors that relate to these aims.

As the official publication of the Society for Vascular Surgery®, the *Journal* will publish, after careful peer review, selected papers presented at the annual meeting of that organization and affiliated vascular societies, as well as original articles from members and nonmembers.

EDITORIAL POLICIES

The editorial policies of the *Journal* are published in the January and July issues, on the Web site (www.jvascsurg.org), on the *Editorial Manager* Web site (<http://jvs.editorialmanager.com>), and are available from the Editorial Office on request.

ADMINISTRATIVE POLICIES

Ownership of manuscript. Manuscripts that are accepted for publication become the property of the *Journal of Vascular Surgery*®, which is copyrighted by the Society for Vascular Surgery®. They may not be published or reproduced in whole or in part without the written permission of the Publisher.

Permission to reproduce published material. Permission to reproduce material published in the *Journal of Vascular Surgery*® must be obtained from the Publisher at (215) 239-3804 or by e-mail at healthpermissions@elsevier.com. Authors will be consulted, when possible, regarding reproduction or republication of their material.

Editors' and Publisher's waiver of responsibility. Statements and opinions expressed in articles and communications herein are those of the author(s) and not necessarily those of the Editors and Publisher. The Editors and Publisher disclaim any responsibility or liability for such material. Neither the Editors nor the Publisher guarantee, warrant, or endorse any product or service advertised in the *Journal*, and they do not warrant any claim made by the manufacturer of such product or service.

Institutional Review. Manuscripts that involve research conducted on human subjects must follow the principles outlined in the Declaration of Helsinki (<http://www.wma.net/e/policy/pdf/17c.pdf>) and include a statement in the Methods section that the

experimental protocol and informed consent were approved by the Institutional Review Board and that all subjects gave informed consent. Manuscripts that report animal experiments must include a statement in the Methods section that the study was approved by the Institutional Review Board and that the animal care complied with the *Guide for the Care and Use of Laboratory Animals*, Institute of Laboratory Animal Resources, Commission on Life Sciences, National Research Council. Washington: National Academy Press, 1996 (<http://stills.nap.edu/readingroom/books/labrats/>)

Clinical Trial Registration. In 2004, the International Committee of Medical Journal Editors (ICMJE) recommended that clinical trials be registered in a public database as a prerequisite for subsequent publication (De Angelis C, Drazen JM, Frizelle FA, et al. Clinical trial registration: a statement from the International Committee of Medical Journal Editors. *N Engl J Med* 2004;351:1250-1). Effective July 1, 2007 the *Journal of Vascular Surgery*® will adopt the policies recommended by the ICMJE and require the preregistration of *all* prospective clinical trials that have a control group (Cronenwett J, Seeger J. Requirement for Registration of Clinical Trials. *J Vasc Surg* 2007;45:1). In addition, the *Journal* will also require the preregistration of *any* commercially sponsored clinical trial, including Phase I and II trials. We do not anticipate registration of retrospective reviews or summaries of standard clinical treatment. Clinical trials that meet the above requirement and commence after July 1, 2007 must be registered prior to enrollment of the first patient. Relevant trials that began before this date must be registered prior to editorial review. Registration must be indicated by providing the unique study number assigned at www.clinicaltrials.gov, the principle site of registration sponsored by the National Library of Medicine (NLM). Detailed directions and a tutorial for registering a trial are available at <http://prsinfo.clinicaltrials.gov>. Authors of unregistered trials or those with inadequate information in the registry will be given an opportunity to convince the Editors that their rationale for omitting this was critical, but it is the *Journal's* expectation that clinical trials involving prospective comparison of treatment or any that are commercially sponsored will all be registered after July 1, 2007.

SUBMISSION OF ORIGINAL MANUSCRIPT

The *Journal's* requirements for submission of a manuscript are in accordance with "Uniform Requirements for Manuscripts Submitted to Biomedical Journals: Writing and Editing for Biomedical Publication" of the International Committee of

Medical Journal Editors (ICMJE), published in JAMA 1997;227:927-34 and available at <http://www.icmje.org/index.html>. This article is not covered by copyright and can be reproduced and distributed if such use is not for profit. The instructions for authors are summarized below.

General requirements

Length. The length of clinical and basic research study manuscripts, including abstract (maximum 400 words), text (average 3200 words and maximum 3500 words), tables (one per page), copies of each figure (one per page), figure legends, and reference list, should not exceed 25 typewritten double-spaced pages with a 12-point font and 1-inch margins. Note that authors can include additional data (eg, details of methods, statistical analysis, tables, discussions) as appendices that will be published on the *Journal's* Web site but not in the print version. Manuscripts that do not meet these guidelines will be sent back to the authors for editing before review.

Submission of manuscripts. Manuscripts should be submitted to the *Journal of Vascular Surgery*[®] electronically, using the Web-based system *Editorial Manager*. To submit a manuscript, authors should login to the Web site <http://jvs.editorialmanager.com>, where detailed instructions can be found. Manuscripts, including figures and tables, are submitted via this Web site in multiple files. To use this system authors must have an Internet connection, an e-mail program, a Web browser, Microsoft Word, and Adobe Acrobat Reader (which can be downloaded at no charge at the above Web site).

Formatting instructions. Manuscripts must be created using Microsoft Word and uploaded in *Editorial Manager*.

- Double-space all sections (ie, abstract, text, acknowledgments, references, figure legends, and tables).
- Use at least 1-inch margins on all sides.
- Use 12-point Times New Roman font.
- Number the pages consecutively in the upper right corner.

Basic information for electronic submission.

To upload a manuscript using *Editorial Manager*, authors must provide the following information:

- A concise, informative, declarative title of the manuscript;
- The preferred name(s), initials, and surname of the author(s) and their highest earned academic degrees, listed in the order that these should appear if the manuscript is published;
- Departmental and institutional affiliations of each author;
- A completed Application for Publication, including all financial or material support provided to the authors;
- The meeting, session (ie, plenary session, poster presentation, etc), date, and place where the paper was presented, if applicable;
- The name and address of the person to whom correspondence is to be addressed;

- The name and address of the author to whom requests for reprints should be addressed (if reprints will be available).

Forms to be transmitted with submitted manuscripts. All manuscripts must be accompanied by a completed Application for Publication. This information will be provided to reviewers and Editors for their evaluation of appropriate involvement. A conflict of interest statement will be published with each manuscript based on the information provided on this form. Authors are referred to a detailed publication on this topic (Johnston KW, Rutherford RB. Disclosure of conflict of interest. *J Vasc Surg* 1999;30:200-2). If an author fails to disclose his/her conflicts interests, the actions open to the Editors are described in Johnston KW, Rutherford RB. Failure to disclose competitive interests. *J Vasc Surg* 2000;31:1306. The *Journal* is a member of the Committee on Publication Ethics (COPE) and will follow its guidelines. More information about COPE may be found at <http://publicationethics.org/>.

On the Application for Publication, you must also report the unique study number assigned at www.clinicaltrials.gov if your study meets our requirements for registration (see the Clinical Trial Registration section.) In addition, the authors must make a meaningful disclosure regarding their discussions of off label or unapproved drugs or devices.

Finally, all revised manuscripts must be accompanied by a Review Response form. This form is available for download from the *Editorial Manager* Welcome page (<http://jvs.editorialmanager.com>).

Material to be submitted after manuscript acceptance.

The Copyright Transfer form will be collected by the Publisher. After a manuscript is accepted, the Publisher will contact the corresponding author and send out a form to sign.
