

Index of Subjects

VOLUME 124 (2013)

- 4-class BCI** Brain–computer interface (BCI); Electroencephalography (EEG); Event-related (de)synchronization (ERD/S); Mental tasks; Follow-up session; Long-term stability; (124) 916
- 600 Hz** Functional Source Separation (FSS); Electroencephalography (EEG); Somatosensory subcortical and primary cortical network; Low frequency oscillations (LFO); High frequency oscillations (HFO); Functional connectivity; Granger causality; Partial Directe; (124) 1216
- A temporally-extended signal space separation algorithm** Vagal nerve stimulator; Magnetoencephalography; (124) 1277
- Action mirroring** Disorders of Consciousness; Spectral EEG; Minimally Conscious State; Vegetative State; (124) 27
- Active mental task** Brain–computer interfaces; Auditory evoked potentials; (124) 83
- Activity-dependent conduction block** Spinal muscular atrophy; Spinal and bulbar muscular atrophy; Chronic inflammatory demyelinating polyneuropathy; Fatigue; Stimulated-single fiber electromyography; (124) 1893
- Acute inflammatory demyelinating polyneuropathy** Acute motor axonal neuropathy; *Campylobacter jejuni*; Guillain–Barré syndrome; (124) 1671
- Acute motor axonal neuropathy** Acute inflammatory demyelinating polyneuropathy; *Campylobacter jejuni*; Guillain–Barré syndrome; (124) 1671
- Acute motor axonal neuropathy** Guillain–Barré syndrome; Multifocal motor neuropathy; Anti-ganglioside antibody; Node of Ranvier; (124) 1928
- Acute postoperative seizures** Extra-temporal epilepsy; Epilepsy surgery; Outcome; (124) 1536
- Acute stroke** Ischaemia; Quantitative electroencephalography; Stroke outcomes; Prognosis; Thrombolysis; (124) 10
- ADHD** EEG; Power spectra; Nonlinear complexity; Coherence; Generalized synchronization; (124) 1139
- AED** Mood disorders; Transcranial magnetic stimulation; Lamotrigine; Long-term potentiation; Motor cortex; (124) 148
- aEEG** Brain monitoring; Preterm baby; Neonatal intensive care unit; Neonatal neurology; SWC; (124) 1807
- Affective valence** EEG; Individual differences; Neuroticism; Single-trial; SVM; (124) 1798
- Afferent patterns** Motor imagery; Neuromuscular electrical stimulation; Efferent pattern classification; BCI-inefficiency; (124) 1824
- Age-related cognitive decline** Cognitive intervention; Cognitive training; Speed of processing; Attention; ERP; (124) 2198
- Ageing** Transcranial magnetic stimulation; Ipsilateral silent period; Motor cortex; Transcallosal inhibition; (124) 346
- Aging** Motor nerve conduction; Peripheral nerve function; Reproducibility; Diabetes; (124) 603
- Aging** Emotions; Word discrimination; ERP; (124) 1986
- Air-conducted sound (ACS)** Vestibular evoked myogenic potential (VEMP); Ocular VEMPs (oVEMPs); Otolith; Brainstem; Internuclear ophthalmoplegia (INO); Medial longitudinal fasciculus (MLF); Crossed ventral tegmental tract (CVTT); Oculomotor nucleus; (124) 770
- Air-conducted sound (ACS)** Ocular vestibular evoked myogenic potential (oVEMP); Electrode; Montage; Null-point; (124) 1232
- Alarm criteria** Somatosensory evoked potentials (SSEPs); Spinal cord monitoring; Spinal cord compression; Functional deficits; Rat; (124) 1031
- Alcohol** EEG; Pharmacodynamics; Cognition; Working memory; Integrated brain function; Lifelike task; Automobile driving simulator; Pattern recognition; Psychoactive drugs; (124) 870
- Allodynia** Chronic pain; Somatosensory system; EEG; Mechanical tactile stimulation; Event-related desynchronization; (124) 154
- Allophonic perception** Dyslexia; Categorical perception; Mismatch negativity; Event-related potentials; (124) 1151
- ALS** split-hand index; Novel diagnostic index; (124) 410
- Altered states of consciousness** EEG; BCI; P300; Standard oddball; (124) 101
- Alzheimer's disease** Electroencephalography (EEG); Drug treatments; (124) 837
- Alzheimer's disease** Parkinson's disease; Cognition; EEG; Dementia; (124) 1970
- Alzheimer's disease** Electroencephalography; Frequency analysis; Topographic analysis; LORETA; Surrogate marker; Mild cognitive impairment; (124) 2146
- Alzheimer's disease** Perceptual processes; Response processes; Flanker task; Event-related potential; (124) 2389
- Amyotrophic lateral sclerosis** Motor unit number estimation; Incremental stimulation; MUNIX; Test–retest reproducibility; Surface-recorded motor unit potentials; (124) 610
- Anesthesia** EEG; Nitrous oxide; Frontal theta; Topography; NMDA receptor; (124) 417
- Animal models** Electroencephalography; EEG; Neurodegeneration; Drug treatments; (124) 437
- Animal models** Cerebellum; Dystonia; Imaging; Pathophysiology; (124) 1269
- Anoxia** Ischemia; Peripheral nerve; Nerve conduction; Velocity; Hysteresis; (124) 792
- Anoxia** Ischemia; Peripheral nerve; Nerve conduction; Velocity; Hypothermia; (124) 801
- Anti-ganglioside antibodies** Guillain–Barré syndrome; Electrodagnosis; Nerve conduction studies; Prognosis; (124) 1456
- Anti-ganglioside antibody** Guillain–Barré syndrome; Acute motor axonal neuropathy; Multifocal motor neuropathy; Node of Ranvier; (124) 1928
- Anti-MAG** IgM-related neuropathy; Distal motor latency; Terminal latency index; Neurophysiology; Clinical phenotype; (124) 1899
- Anti-NMDA receptor encephalitis** Electroencephalogram; Outcome; Child; (124) 2354
- Antidepressants** Prediction; Machine learning; Mood disorders; Major depressive disorder; EEG; Personalized medicine; Biomarkers; (124) 1975
- Antihistamine** Sedation; Reaction time; Postural tremor; (124) 1840
- Antisaccades** Eye movements; Normative data; Eye tracking; Prosaccades; Smooth pursuit; Skewness; (124) 2216
- Anxiety and fear** Behavioural activation; Auditory startle response; Prepulse inhibition; Event-related potentials; LORETA; (124) 292
- Aphasia** Personal-emotional words; ERP; Emotional processing; Language; Stroke; (124) 1771
- Approximate Entropy** Sample Entropy; Skin-to-skin contact; Neonates; Sleep EEG; Brain maturation; (124) 238
- Arm** Stretch reflex; Modulation; Stroke; Brain; Long-latency; (124) 1373
- Artefact removal** Signal Space Separation; Beamforming; Somatosensory evoked potential; Orthodontic; Sensorimotor cortex; (124) 107
- Astrocytes** Fabry disease; Lysosomal storage disease; Transcranial magnetic stimulation; Corticospinal excitability; (124) 1381
- Asynchronous EMG** Spinal cord injury; Soleus; H-reflex; (124) 1853
- Attention** Neurophysiology; Brainstem; Healthy; Human; (124) 126

- Attention** Cognitive intervention; Cognitive training; Age-related cognitive decline; Speed of processing; ERP; (124) 2198
- Attention** Auditory ERP; Mismatch negativity; Movie soundtrack; Masking noise; Pitch; (124) 2378
- Attention** Neurofeedback; Sham-neurofeedback; Frontal-midline theta; Working memory; (124) 2406
- Attention deficit hyperactivity disorder** Sustained attention; Executive control; Functional magnetic resonance imaging; Continuous performance task; (124) 2181
- Attention-deficit/hyperactivity disorder** Electrophysiology; Event-related potentials; (124) 644
- Auditory** Brain-computer interface; EEG; P300; Speller; Workload; (124) 327
- Auditory cortex** Gamma-band; Reliability; Auditory processing; Variability; (124) 70
- Auditory cortex/brain** Deafness/hearing loss; Long-term development; Child/adolescent; Cochlear implant/electrical stimulation; Electrophysiology/auditory evoked potential; (124) 1868
- Auditory ERP** Mismatch negativity; Movie soundtrack; Attention; Masking noise; Pitch; (124) 2378
- Auditory evoked potentials** Active mental task; Brain-computer interfaces; (124) 83
- Auditory feedback** Sex; Development; Children; Voice control; Event-related potential; (124) 503
- Auditory feedback** Voice control; Opposing response; Following response; Event-related potential; (124) 2161
- Auditory perception** Event-related potentials; Pitch perception; Sensory memory; Music; (124) 1115
- Auditory processing** Auditory cortex; Gamma-band; Reliability; Variability; (124) 70
- Auditory processing** Stimulus onset asynchrony (SOA); Temporal regularity; Middle latency response; Deviance detection; Mismatch negativity (MMN); (124) 2397
- Auditory startle response** Anxiety and fear; Behavioural activation; Prepulse inhibition; Event-related potentials; LORETA; (124) 292
- Auditory stimulation** Blink reflex; Trigeminal stimulation; Postparalytic facial syndrome; Blepharospasm; (124) 120
- Automated detection** Electroencephalography (EEG); Epilepsy; Epileptiform discharges; Template matching; Computerized interpretation; (124) 2328
- Automated interpretation** Quantitative EEG analysis; Background pattern; Guidelines; Inter-rater reliability; (124) 228
- Automobile driving simulator** EEG; Pharmacodynamics; Cognition; Working memory; Integrated brain function; Lifelike task; Pattern recognition; Alcohol; Psychoactive drugs; (124) 870
- Autonomic nervous system** Heart rate variability; Coma; Comatose patients; (124) 589
- Autonomic nervous system** Parkinson's disease; Heart rate variability; Slow sleep; Rapid eye movement; Disease severity; (124) 1163
- Autonomic nervous system** Non-invasive brain stimulation; Transcranial magnetic stimulation; Transcranial direct current stimulation; Systematic review; (124) 1716
- Autonomous nervous system** Quantitative sensory testing; QST; Hand-arm vibration syndrome; HAVS; Vibration-induced white fingers; VWF; Neurography; Carpal tunnel syndrome; CTS; (124) 1680
- Awareness** Electroencephalography (EEG); Emotion; Face; Direction of information (DTF); (124) 263
- Axonal lesion** Ulnar nerve; High resolution ultrasonography; Demyelinating lesion; (124) 619
- Background pattern** Quantitative EEG analysis; Automated interpretation; Guidelines; Inter-rater reliability; (124) 228
- Balance** Galvanic vestibular stimulation; Vestibular schwannoma; Vestibular system; Vestibulospinal; (124) 1835
- Barrett impulsiveness scale (BIS)** Cross-frequency phase-amplitude coupling (CFPAC); Risk-taking propensity (RTP); Domain-specific risk-taking (DOSPERT) scale; (124) 2172
- Basal ganglia** Progressive; Supranuclear palsy; Parkinson's disease; Saccades; Superior colliculus; Brainstem; (124) 354
- Basal ganglia** Beta oscillations; Beta rebound; Local field potential; Synchronized tapping; (124) 565
- Basal ganglia** Saccade; Parkinson's disease; Superior colliculus; Substantia nigra; Inhibition; (124) 1491
- Bayesian** EEG; Neonatal; (124) 452
- BCI** Altered states of consciousness; EEG; P300; Standard oddball; (124) 101
- BCI illiteracy** Brain-Computer Interface; Goal oriented imagination; Kinaesthetic imagery; Visual imagery; Motor imagery questionnaire; (124) 1586
- BCI inefficiency** Brain computer interface; Event related potentials; Neurodegenerative disease; Communication; P300-speller; Online classification accuracy; Bit rate; (124) 893
- BCI-inefficiency** Motor imagery; Neuromuscular electrical stimulation; Afferent patterns; Efferent pattern classification; (124) 1824
- Beamforming** Signal Space Separation; Somatosensory evoked potential; Orthodontic; Sensorimotor cortex; Artefact removal; (124) 107
- Beamforming** Epilepsy; Neuroimaging; Magnetoencephalography; Kurtosis; Localisation; (124) 658
- Behavioral disorder** EEG patterns; Triphasic waves; Encephalopathy; Outcome; Neurocritical care; (124) 1952
- Behavioural activation** Anxiety and fear; Auditory startle response; Prepulse inhibition; Event-related potentials; LORETA; (124) 292
- Bereitschaftspotential** Cortical electrical stimulation; Optic ataxia; Posterior parietal cortex; Reaching; (124) 2230
- Bereitschaftspotential (BP)** Neuro-feedback (NFB); Slow cortical potentials (SCPs); Parkinson's disease (PD); Supplementary motor area (SMA); (124) 1398
- Beta oscillations** Basal ganglia; Beta rebound; Local field potential; Synchronized tapping; (124) 565
- Beta rebound** Basal ganglia; Beta oscillations; Local field potential; Synchronized tapping; (124) 565
- Beta rebound** Motor imagery; Electroencephalogram (EEG); Event-related synchronization (ERS); Event-related desynchronization (ERD); Brain-computer interface (BCI); (124) 2153
- Bilateral synchrony** Corpus callosum; Intra-operative EEG; Epilepsy surgery; Wavelet transform coherence; Trend analysis; (124) 2091
- Biomarkers** Prediction; Machine learning; Mood disorders; Major depressive disorder; EEG; Antidepressants; Personalized medicine; (124) 1975
- Bipolar disorder** Schizophrenia; RSVP; ERPs; N2pc; P1; (124) 881
- Bit rate** Brain computer interface; Event related potentials; Neurodegenerative disease; Communication; BCI inefficiency; P300-speller; Online classification accuracy; (124) 893
- Blepharospasm** Blink reflex; Trigeminal stimulation; Auditory stimulation; Postparalytic facial syndrome; (124) 120
- Blink reflex** Trigeminal stimulation; Auditory stimulation; Postparalytic facial syndrome; Blepharospasm; (124) 120
- Body perception** Face perception; Inversion effect; N170; (124) 686
- Body unloading** Corticospinal excitability; Motor evoked potentials; Transcranial magnetic stimulation; Walking; (124) 2431
- Botulinum neurotoxin serotype D** Botulinum neurotoxins; Human and mouse neuromuscular junction; Rat primary neuronal cultures; Compound muscle action potential; (124) 999
- Botulinum neurotoxins** Botulinum neurotoxin serotype D; Human and mouse neuromuscular junction; Rat primary neuronal cultures; Compound muscle action potential; (124) 999
- Boundary element method** Transcranial magnetic stimulation; Image guided navigation; Electromagnetic modeling; (124) 1995
- Brain** Stretch reflex; Modulation; Stroke; Arm; Long-latency; (124) 1373
- Brain activity** Electroencephalography; Pedaling; (124) 379
- Brain computer interface** Event related potentials; Neurodegenerative disease; Communication; BCI inefficiency; P300-speller; Online classification accuracy; Bit rate; (124) 893
- Brain Computer Interfaces** RSVP; ERPs; Speller; (124) 901
- Brain death** EEG; Legal issues; Diagnostic test assessment; Critical care; Organ donation; (124) 2362
- Brain hypoperfusion** Near-infrared spectroscopy; Transcranial Doppler; Mild cognitive impairment; Cerebral oxygen deficiency; (124) 851
- Brain maturation** Approximate Entropy; Sample Entropy; Skin-to-skin contact; Neonates; Sleep EEG; (124) 238
- Brain monitoring** Preterm baby; Neonatal intensive care unit; Neonatal neurology; aEEG; SWC; (124) 1807
- Brain plasticity** Placebo; Motor learning; Transcranial magnetic stimulation; Purdue pegboard; Neurorehabilitation; (124) 1646
- Brain Research and Integrative Neuroscience Network (BRAINnet)** Polymorphisms; P300; P3; ERP; Endophenotype; Genomics; *COMT*; *DBH*; Dopamine; (124) 909
- Brain states** Spinal cord injury; Chronic pain; Electroencephalography; Non-pharmacological treatments; (124) 2016
- Brain stimulation** Neuromodulation; Low voltage; Skin impedance; Limited Total Energy; (124) 551
- Brain-computer interface** EEG; P300; Auditory; Speller; Workload; (124) 327
- Brain-computer interface** Sensorimotor rhythm; Multivariate decoding; Multicollinearity; (124) 1297
- Brain-computer interface** Electroencephalography; Event-related potential; P300; Speller; Natural language processing; (124) 1321
