## CONTENTS

### COVER

**On the cover:** A common trauma that occurs during childhood and adolescence is avulsion of a maxillary central incisor. The treatment choices are replantation of the avulsed central incisor or autotransplantation of a premolar. How should the choice between these two options be made? Read the Point/Counterpoint articles by Steiner and Janakievski, respectively, to learn more. The smiling patient on the cover is Mary Bis, who was treated orthodontically by Drs. Charles F. Munk and Charles W. Munk from Clarkston, Michigan.
