This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Enhanced Social Attention in Female Infant Siblings at Risk for Autism**

RH = Social Orienting Advantage

Katarzyna Chawarska, PhD; Suzanne Macari, PhD; Kelly Powell, PhD; Lauren DiNicola, BS;  
Frederick Shic, PhD

This article is discussed in an editorial by Dr. Jeremy Veenstra-VanderWeele on page xx.

Supplemental material cited in this article is available online.

Accepted December 10, 2015

This article was reviewed under and accepted by associate editor James J. Hudziak, MD.

Drs. Chawarska, Macari, Powell, Shic, and Ms. DiNicola are with Child Study Center, Yale University School of Medicine, New Haven, CT.

The study was supported by the National Institute of Child Health and Development, P01 HD003008, Project 1 (K.C.), National Institutes of Mental Health R01 MH087554 (K.C.), and the Simons Foundation (187398, Ami Klin).

The authors thank Gabriella Greco, BA, Lilli Flink, BA, Sharlene Lansiquot, BA, Carla Wall, BA, Elizabeth Kim, PhD, and Quan Wang, PhD, of Yale University School of Medicine, for assistance in data collection and manuscript preparation. The authors wish to express their appreciation to the families and their children for their participation.

Drs. Chawarska and Shic served as the statistical experts for this research.

K.C., S.M., and F.S. developed the initial idea and design of the study. K.C. and F.S. had full access to the data and take responsibility for the integrity of the data. K.C. performed statistical analysis and takes responsibility for the accuracy of the data analysis. S.M. and K.P. conducted and supervised participant characterization. F.S. supervised technological development and technical aspects of experimental procedure, data acquisition, and processing. L.D. contributed to eye tracking data collection and manuscript preparation. K.C. wrote the manuscript.

Disclosure: Dr. Shic has received research funding from Hoffmann-La Roche Ltd and Janssen Research and Development, LLC. Drs. Chawarska, Macari, Powell, and Ms. DiNicola report no biomedical financial interests or potential conflicts of interest.
